

Project → Beat Saber

Core Mechanics & Concept

- ↳ Actions: Dodge and slice
- ↳ Gameplay: High speed with multiplayer capabilities

Tracking & Vision Technologies

- ↳ camera + AI + Game → Used for location tracking
- ↳ Kinect → uses IR and camera to make point cloud
- ↳ Multi Camera System → For full 3d tracking of the space
- ↳ Head Tracking → Used to enhance 3d feel

Sensors & Hardware

- ↳ IMU → embedded in saber
- ↳ Ultrawideband → distance sensors for precise spatial positioning
- ↳ Haptics → haptic feedback to simulate impacts

Immersion & Environment

- ↳ Fully Immersive Room → Lasers mounted on walls
→ Pressure sensors on floor
